

January 8, 2012

Seedling Program order forms for 2012 are now available, thanks to the Greenbelt Management Committee Chair Kathy Dillon-Durica. The order form provides information about the available species, the two seedling sizes, costs, tree descriptions and planting condition recommendations. Kathy noted that some species of these flats may be in limited supply; the orders are filled based on the earliest order date and payment date. Checks should be payable to CLRRA and payment should accompany your order form when you submit it to the Association office. Greenbelt Management Committee members will bring the flats to the Basecamp parking area on Saturday, June 9, 2012, for you to pick up. Order forms are available in the office or on the Crystal Lakes web site at www.crystal-lakes.org.

Remember that the Crystal Lakes Water Augmentation Plan allows water for household use only. Irrigation of seedlings must be accomplished by importing water individually or purchasing non-potable imported water from CLWSA.

We had a dusting of snow yesterday, and temperatures in the teens last night. Forecasts are for a possible storm mid-week.

I'll keep you posted.
Jody
